

Spiders

Do you know the names for any of the body parts on this spider?

**There are lots of
different spiders.
Spiders come in lots of
different colours, shapes
and sizes.**

This is the Garden Spider.

This is the house spider.

This is the Water Spider.

This is a Tarantula.

This is a Black Widow Spider.

**Spiders have 8 legs.
If a spider loses a leg, it grows back.**

Most spiders have eight eyes but there are some that have 2,4,6 or even 12 eyes!

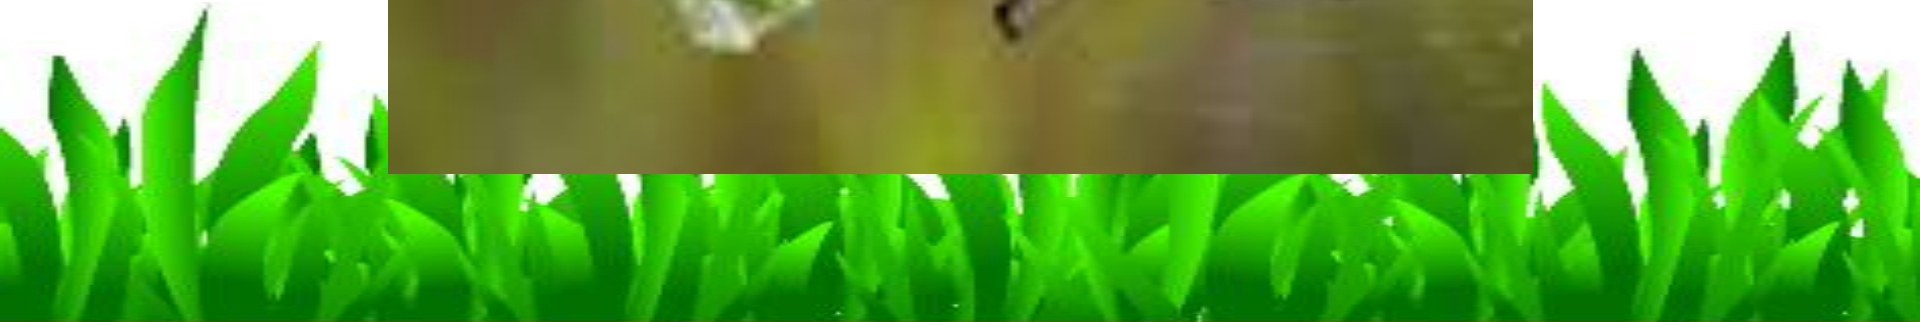

Boy spiders are bigger than girl spiders.

Spiders spin a silky web with their spinnerets. It is very strong.

Spiders wrap their prey in silk and keep them on their web.

Spiders spin a cocoon to lay their eggs in.

Spiders hatch from eggs. This spider is carrying its cocoon with its eggs inside.

Can you see the young spiders coming out from the cocoon?

This is a mother spider and her Spiderlings.
